Empire's Workshop: Latin America, The United States, And The Rise Of The New Imperialism (American Empire Project)

Synopsis

"Grandin has always been a brilliant historian; now he uses his detective skills in a book that is absolutely crucial to understanding our present." •Naomi Klein, author of No Logo

The British and Roman empires are often invoked as precedents to the Bush administration's aggressive foreign policy. But America's imperial identity was actually shaped much closer to home. In a brilliant excavation of long-obscured history, *Empire's Workshop* shows how Latin America has functioned as a proving ground for American strategies and tactics overseas. Historian Greg Grandin follows the United States' imperial operations from Jefferson's aspirations for an "empire of liberty" in Cuba and Spanish Florida to Reagan's support for brutally oppressive but U.S.-friendly regimes in Central America. He traces the origins of Bush's current policies back to Latin America, where many of the administration's leading lights first embraced the deployment of military power to advance free market economics and enlisted the evangelical movement in support of their ventures. With much of Latin America now in open rebellion against U.S. domination, Grandin asks: If Washington failed to bring prosperity and democracy to Latin America • its own backyard "workshop" • what are the chances it will do so for the world?

This is truly an excellent book that in a clear way illustrates American involvement in South and Central America. The book begins by telling the story about how Kennedy set out to reshape the

Americas into a place where true revolutionary ideals could grow spread by free men and women. He started something called the "Alliance for progress" which contained the nucleus of this idea. The problem was that he armed exactly those people who where completley opposed to these revolutionary ideas. thus began an era of counterrevolution, that gave birth to the death squads and coups in Brazil, Uruguay, Chile and Argentina. When Richard Nixon arrived in Venezuela in 1958 his limousine was attacked by an angry mob. The next day they cleared the streets with tear gas so he could leave safely. This set the tone for American and Latin American relation in the coming years. Allendes election in Chile terrified Nixon because Allende wasnt trying to create another Cuba with Soviet style repression of civil liberties. He wanted a socialist state that would be a symbol of real reform, and this was truly frightening to Washington. Therefore Nixon with the help of the strong arm of the CIA ordered Allendes downfall. Later when Reagan came to power he saw his purpose to reinstate a sense of national purpose and this he did by restoring military power. Almost all of Latin America was ruled at the time by pro american dictators, but something was starting to brew in Central America. The hardest hit countries where El Salvador, Nicaragua and Guatemala. US allies killed approximatley 300,000 people during Reagans two terms. Hundreds of thousands where tortured.
