# Naturopathic Oncology

## Synopsis

Third edition (2016): Dr. Neil McKinney's fifth book on naturopathic oncology is updated with the rewards of clinical practice, study, research and reader feedback over the last several years. Patients and integrative physicians will find it easier to navigate, more complete, and of real service. DO: use this book to be informed about your best options, and what to expect them to accomplish. THEN: get expert guidance from a licensed, accountable, health professional team experienced in treating cancer. Cancer is a life-threatening disease in most cases. You do not have the objectivity, experience or knowledge to make critical medical decisions alone. This is not just a disclaimer! Cancer is unforgiving of delays and poor choices.

## Book Information

Paperback: 546 pages

Publisher: Creative Guy Publishing; Third edition edition (January 6, 2016)

## Customer Reviews

An amazing compilation of integrative/naturopathic interventions for cancer care. Dr. McKinney has documented a myriad of natural and complementary protocols for the various cancers plus provided vital information on chemotherapeutic drug depletions and interactions. For any integrative oncologist, M.D., naturopath or practitioner dealing with cancer patients, this book is a must. My only recommendation is that in subsequent editions, Dr. McKinney add a glossary of terms and acronyms.
