# Human Caring Science: A Theory Of Nursing (Watson, Nursing: Human Science And Human Care)

## **Synopsis**

Human Caring Science: A Theory of Nursing, Second Edition by renowned nurse theorist Jean Watson discusses the balance between science and caring that forms the basis of the nursing profession. Watson's Theory of Human Care draws from Western and Eastern philosophers, approaching the human care relationship as a moral concept. Further, it seeks to elucidate the human care process in nursing, preserve humanity and the inner life of patients, and reintroduce true caring and healing into educational and clinical practices. Thoroughly revised and updated, each chapter provides fresh insights and contemporary thinking making it accessible to undergraduates as well as graduates and practicing nurses. This Second Edition also includes a new research chapter with the latest empirical work on assessing and measuring caring, examples of practice models, and multi-site research.

## **Customer Reviews**

I received a brand new book quickly. I needed this text for theory & it was a good reference. It was pricey for such a short text but i needed it. I swear Watson must've been on a good one to write this book.

This was a revised edition of the Theory of Human Caring by Jean Watson. It was an excellent review and had additional material regarding the theory as she developed it into a science of caring.

I used this as one of my reference in a 10 page paper describing the theory of human caring. I was very interested in what she was now relating to this theory as she developed it in 1979 and revised it in 1985 and 2012. I used her theory for the basis of my thesis in the eighties for a MSN.

I bought this book for my theory class and used to write my my paper on the human caring theory.

NICE UPDATE OF THE THEORY WITH GREAT EXPLANATIONS OF THE CURRENT STATUS OF HER THEORY AND UPDATED APPLICATIONS. CURRENT FOR NEW RESEARCH ON CARING. A MUST READ.

Useful as a basis for theory of ethical care of patients. Highly recommend getting this book as a resource for nursing theory.
