## Synopsis

Providing a reader-friendly "building-block" approach to the essentials of diagnostic microbiology, this accessible, full-color text helps you develop the problem-solving skills necessary for success in the clinical setting. This updated edition has new content on nanomedicine and HIV/AIDS and the immunocompromised patient, including the latest information on prevention, treatment modalities, and CDC guidelines. Updated photos offer new examples of automated lab instruments, while case studies, review questions, and learning objectives present information in an easy-to-learn way. A building-block approach encourages you to use previously learned information to sharpen your critical-thinking and problem-solving skills. Full-color design, with many full-color photomicrographs, prepares you for the reality of diagnostic microbiology. Learning objectives at the beginning of each chapter supply you with a measurable outcome to achieve by completing the material. A case study at the beginning of each chapter provides you with the opportunity to form your own questions and answers through discussion points. Issues to Consider boxes encourage you to analyze important points. Bolded key terms at the beginning of each chapter equip you with a list of the most important and relevant terms in each chapter. Points to Remember sections at the end of each chapter identify key concepts in a quick-reference, bulleted format.

## Customer Reviews

A good read...even if you have to purchase!!!! I'll keep mine until it falls apart.

Love the book, well writing and nice pictures.

Sister-in-law used for school. Haven't heard anything bad.

Delivered sooner than expected. Excellent book!!!

The book is missing about 50 pages. I received it new in shrink wrap and didn't see that the pages were missing until I needed them. Made it kinda difficult to STUDY!!!

great help in the lab

Thank you so much
