# Clinical Biochemistry: An Illustrated Colour Text, 4e

## Synopsis

This edition covers all aspects of the subject needed by medical students. It is a volume in the Illustrated Colour Text series, with the subject matter divided into double-page spreads; this makes the information very accessible to the reader. Full use is made of flow charts and other graphics; clinical "boxes;" summary points; case histories; and clinical photographs. The whole orientation of the book is to concentrate on how clinical biochemistry relates to the care of the patient and to ensure that the medical student understands how to interpret laboratory. Covers clinical biochemistry from the point of view of the clinician using the diagnostic service. Presents topics in easily accessible two-page spreads. Includes mini case histories, key point boxes, flowcharts, and summary points. Well illustrated with four-color drawings and clinical photographs. New appendix added of annotated web resources for students to take further many of the topics covered in the book. To reflect the difficulties people have sometimes in analyzing hyper- and hypo-kalaemia, the existing spread is split into two - one spread on hyperkalaemia and another on hypokalaemia. The spread on hypertension will be revised and updated to reflect the fact that biochemistry is used as much or more in guiding treatment as it is in screening for secondary hypertension. Spreads on Myocardial Infarction, Cancer and Tumour Markers will all substantially revised and updated.

## Book Information

Series: Illustrated Colour Text

Paperback: 188 pages

Publisher: Churchill Livingstone; 4 edition (August 12, 2008)

Language: English

ISBN-10: 0443069328

Product Dimensions: 11.5 x 8.2 x 0.4 inches

Shipping Weight: 1.5 pounds

Average Customer Review: 3.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #730,227 in Books (See Top 100 in Books) #180 in Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Biochemistry #828 in Books > Engineering & Transportation > Engineering > Bioengineering > Biochemistry #4330 in Books > Science & Math > Chemistry

## Customer Reviews

This is a good concise book for beginners. It has some good information about the clinical

laboratory in biochemistry. It is however not comprehensive and does not contain all the information for the clinical laboratory. Please see the index of this book before you buy it.TM
